PROJECTS

HealthCare Appointment Platform

Node.js, Express.js, MongoDB, Mongoose, JWT, React

- Developed a booking platform with 3-tier role architecture (patient, doctor, admin), managing the appointment lifecycle across 5 API modules
- Implemented JWT authentication with role-based middleware and atomic slot validation, eliminating double-booking through MongoDB atomic operations
- Architected 15+ secured REST endpoints, reducing scheduling conflicts to zero through real-time slot locking and approval workflows

Inventory & Order Management System

React, Node.js, Express, PostgreSQL, Prisma, JWT, Jest

- Engineered an inventory platform with 12+ REST modules, RBAC, and atomic order-to-stock transactions across multi-table operations
- Designed rollback-safe Prisma transactions using \$transaction, preventing stock corruption on partial failures across multi-item orders
- Automated 24 test cases (Jest/Supertest) covering RBAC and transaction rollback, identifying 2 critical edge cases pre-deployment
